MAHMOUD ELHADAD

Backend Developer (PHP / Laravel)

CONTACT

Location: Zagazig, Egypt **Phone:** +20 109 284 2953 **Email:** mahmoudelhadad314@gmail.com
LinkedIn: linkedin.com/in/mahmoud-elhadad-05937a376 **GitHub:** github.com/Mahmoud-Elhadad

SUMMARY

Backend Developer with a focus on PHP and Laravel, building e-commerce platforms including a multi-vendor marketplace with role-based access, event-driven email and query caching. Hands-on experience with OOP, Eloquent and MySQL through project work. Fourth-year IT student seeking a junior backend role.

TECHNICAL SKILLS

Backend: PHP, OOP, Laravel, RESTful APIs, Performance Optimization (Caching, Queues)
Database: MySQL, Eloquent ORM
Tools: Git, GitHub, Postman
Frontend (basic): HTML5, CSS3, JavaScript, jQuery, Bootstrap

PROJECTS

Vendora Multi-Vendor E-Commerce Platform GitHub **Laravel, MySQL, Bootstrap, AJAX**

- Built a multi-vendor platform with Laravel 12 and PHP 8.2: storefront plus separate guards for admins and merchants.
- Implemented Gates and Policies so merchants manage only their own products, with admin-approved sign-up.
- Built event-driven email with Events, Listeners and queue-ready Mailables, plus database and mail Notifications for admins.
- Cut homepage queries from 16 to 6 (and loaded models from 65 to 5) by caching products, best-sellers and categories for 1 hour with auto-invalidation, and used eager loading to avoid N+1 queries.
- Developed the storefront (search, filters, sorting, pagination, cart, wishlist) and dashboard CRUD with multi-image upload.

Laravel E-Commerce Platform GitHub (Porto) GitHub (Ludis) **Laravel, MySQL, AJAX, Bootstrap**

- Built an e-commerce platform with Laravel 12 and PHP 8.2 in two versions with different UI designs, using dual-guard authentication, middleware, Form Requests and eager loading.
- Built a cart and wishlist with live totals and quantity updates, using AJAX in the Porto version, and admin CRUD for products, categories, admins and a messages inbox.

eMart E-Commerce Web Application GitHub **PHP, MySQL, AJAX, Bootstrap**

- Built an e-commerce platform from scratch with session-based login, product pagination, live search, per-user star ratings, and an AJAX-powered shopping cart.
- Developed a role-protected admin dashboard with CRUD for products (multi-image upload), users and categories, and fixed security bugs such as unauthorized cart and rating manipulation.

E-Commerce Web Application with Admin Dashboard GitHub **PHP, MySQL, Bootstrap, JavaScript**

- Built an e-commerce store with an admin dashboard using procedural PHP, MySQL (MySQLi) and Bootstrap on XAMPP, with storefront pages for products, details, cart, checkout, registration and login.
- Built admin-only session authentication and CRUD for products (multi-image upload, categories, stock, sale price) and users with roles, using password_hash and Egyptian phone number validation.

EDUCATION

Bachelor's Degree in Information Technology (IT) **Expected 2027**
Faculty of Computers and Informatics, Zagazig University

- Fourth-year student | GPA: 3.67 / 4.0

TRAINING AND CERTIFICATIONS

Bravo Programming Company, Zagazig **2025**

- **Building Web Applications with PHP Laravel:** two-month training covering routing, controllers, middleware, Eloquent models and relationships, migrations and authentication; certificate of achievement
- **Programming Languages for Web (Br135101):** HTML5, CSS3, JavaScript, PHP, MySQL, React JS, Laravel; certificate of achievement

LANGUAGES

Arabic: Native | **English:** Intermediate
